FatPipe's Total Security 360 Honored as 2025 MSP Today Product of the Year

RHEA - AI SUMMARY

FatPipe (NASDAQ: FATN) announced that its **Total Security 360** cybersecurity product has received the **2025 MSP Today Product of the Year Award** from TMC's MSP Today. The solution combines advanced cybersecurity features including intelligent traffic failover, multi-path encryption, deep network observability, and integrated threat protection for secure network connectivity across cloud, hybrid, and on-premise environments.

The award recognition comes amid significant market growth potential, with the global SD-WAN market projected to grow at a **CAGR of 31.14%** from 2024 to 2032, following its **\$5.2 billion valuation in 2023**.

POSITIVE

- Product recognition with MSP Today Product of the Year Award 2025
- Operating in SD-WAN market with projected 31.14% CAGR through 2032
- Market opportunity in growing sector valued at \$5.2B in 2023

NEGATIVE

- None.

06/25/2025 - 09:00 AM

SALT LAKE CITY, June 25, 2025 /PRNewswire/ -- FatPipe, Inc. (NASDAQ: **FATN**) ("FatPipe" or the "Company") today announced that its Total Security 360 cybersecurity product has been recognized with 2025 MSP Today Product of the Year Award by TMC's MSP Today.

The MSP Today Product of the Year Award honors innovative, best-in-class solutions that significantly enhance managed service providers' (MSPs) capabilities to deliver exceptional value to their clients. Winners were selected by the editorial staff at TMC's MSP Today based on each solution's innovation, demonstrated business value, and ability to meet critical customer needs.

"We are honored to receive this prestigious recognition from MSP Today," said Dr. Ragula Bhaskar, CEO of FatPipe. "This award validates the strategic investments we've made in innovation and underscores the strength of our solutions in addressing the evolving network and cybersecurity needs of enterprises. It also reinforces our commitment to supporting our channel partners and managed service providers by equipping them with industry-leading technology."

FatPipe Total Security 360 combines advanced and comprehensive cybersecurity measures, providing enterprises with seamless, reliable, and highly secure network connectivity across cloud, hybrid, and on-premise environments. The product's distinctive features include intelligent traffic failover, multi-path encryption, deep network observability, and integrated threat protection—all critical to maintaining uninterrupted, and highly secure business operations.

According to research from [S&S Insider](#), the global Software-Defined Wide Area Network (SD-WAN) market, valued at \$5.2 billion in 2023, growing at a compound annual growth rate (CAGR) of 31.14% from 2024 to 2032, highlighting the significant and expanding market opportunity for FatPipe's solutions.

About FatPipe, Inc.

FatPipe pioneered the concept of software-defined wide area networking (SD-WAN) and hybrid WANs that eliminate the need for hardware and software or cooperation from ISPs and allows companies and service providers to control multi-link network traffic. FatPipe has also pioneered single stack cybersecurity combining SDWAN and cybersecurity. FatPipe currently has 12 U.S. patents related to multipath, software-defined networking. FatPipe products are sold by 200+ resellers worldwide. For more information, visit www.fatpipe.com. Follow us on X @FatPipe_Inc.

Forward-Looking Statements

Certain statements contained in this press release, including statements relating to the Company's expectations regarding the completion, timing and size of its proposed public offering and listing may constitute forward-looking statements within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements can generally be identified by our use of forward-looking terminology such as "may," "will," "expect," "intend," "anticipate," "estimate," "believe," "continue," or other similar words. Readers are cautioned not to place undue reliance on these forward-looking statements, which are based on management's current expectations and are inherently subject to various risks, uncertainties, assumptions, or changes in circumstances that are difficult to predict or quantify. These risks and uncertainties include, but are not limited to, risks and uncertainties associated with the consummation of the offering and other risks described in FatPipe's registration statement on Form S-1, as it may be amended from time to time. Except as required by law, FatPipe expressly disclaims a duty to provide updates to forward-looking statements, whether as a result of new information, future events or other occurrences.
