FatPipe Ships Upgrade Of VPN Tools

by TechWeb.com, 2/12/2003 3:15 PM EST

FatPipe Networks shipped Wednesday an upgrade of performance technologies for VPNs. Version 3.0 of MPVPN includes features for better load balancing and route management.

The upgrade's enhancements include fault tolerance for remote VPN users and improved load-balancing options for Internet traffic, as well as MPVPN peer traffic. In addition, administrators can define routing criteria based on application and provider.

Pricing was not released. FatPipe is headquartered in Salt Lake City.
