FatPipe Networks Chosen as One of Utah's 100 Fastest Growing Companies for the Sixth Year in a Row

Posted 19 November 2008 @ 08:00 am ET

SALT LAKE CITY, UT -- (Marketwire) -- 11/19/08 -- FatPipe Networks(TM), the inventor of router clustering devices for reliable, redundant and fast Internet/WAN connections, today announced it was listed on the MountainWest Capital Network's Utah 100, a listing of the fastest growing companies, for the sixth consecutive year.

The fourteenth annual Utah 100 Awards, sponsored by the MountainWest Capital Network, honored the 100 fastest growing companies in the state of Utah at a recent luncheon event. The companies were ranked based on percentage revenue growth over a five-year period from 2003-2007.

FatPipe was ranked within the top 25 fastest growing companies in the state of Utah three of the six years it has been recognized. FatPipe ranking 23rd in 2005, 6th in 2004, and 17th in 2003, and 64th in 2006, 75th in 2007, and 93rd this year.

"We are delighted that we have been on the list of the fastest growing companies in Utah since 2003," said Ragula Bhaskar, Ph.D., CEO and President of FatPipe Networks. "It speaks to the hard work and dedication of our staff and their successful efforts in selling and developing our innovative technology

products.

About FatPipe Networks

FatPipe Networks is the inventor and multiple patents holder of technology that provides the highest levels Internet/Wide Area Network (WAN) reliability, fault tolerance, redundancy, security and acceleration. FatPipe's line of products provide customers with a large selection of features that help them run mission critical Internet/WAN applications over any type of network infrastructure, including Data Centers and Disaster Recovery sites. FatPipe products play an important role in maintaining high levels of business continuity for customers that require always up WAN/Internet connectivity.

In addition to various standard features such as intelligent and automatic WAN/Internet redundancy and reliability, FatPipe technology also provides customers tools to optimize their network using QoS, data compression, policy routing, and additional security. www.fatpipe.com
