FatPipe Participates in ONUG's First Multi vendor Proof of Concept Based on Real IT User Requirements

FatPipe Networks – November 05, 2015 12:00 ET

SALT LAKE CITY, UT and NEW YORK, NY--(Marketwired - November 05, 2015) - FatPipe Networks today showcased a Multivendor Proof of Concept (PoC) as a part of ONUG's the first ever SD-WAN workgroup PoC Demonstration at ONUG Fall 2015. Based on ONUG's original use case requirements, the demonstrations mark the completion of ONUG's first full cycle of its working groups -- from original use case requirements to true product development. The ONUG PoC demonstration fair brings to life the growing software-defined infrastructure ecosystem and buildout of a new open framework.

"We were thrilled to see that so many members of the ONUG vendor community, like FatPipe Networks, are engaging with users to develop multivendor interoperable PoCs based directly on user-mandated requirements," said Nick Lippis, Co-Chairman and Co-Founder of ONUG. "This illustrates a major step forward in ONUG's mission to facilitate collaboration between the IT user and vendor communities aimed at driving the development of open interoperable hardware and software-defined infrastructure solutions."

"As the #1 company in SD-WAN, we were happy to be a part of ONUG's demonstrations," added Dr. Ragula Bhaskar, President and CEO of FatPipe Networks. "We appreciate ONUG bringing attention to the software-defined hybrid WAN market we have been pioneering and evangelizing for the past decade. We were thrilled to show the ONUG community a typical enterprise network in which we are deployed."

About ONUG

ONUG is the leading user-driven community of IT executives focused on leveraging the power of their engineering and procurement to influence the pace and deployment of open networking solutions. The ONUG Board is composed of IT leaders from Bank of America, BNY Mellon, Cigna, Citigroup, Credit Suisse, FedEx, Fidelity Investments, Gap, Inc., Intuit, JPMorgan Chase, the Lippis Report, Morgan Stanley, Pfizer, UBS and Yahoo. For more on ONUG, go to www.OpenNetworkingUserGroup.com or follow us on Twitter @ONUG_

About FaPipe

FatPipe® Networks invented the concept of software defined wide area networking and hybrid WANs that eliminate the need for hardware and software, or cooperation from ISPs and allows companies to control WAN traffic. FatPipe currently has 11 U.S. patents and over 180 technology claims related to multipath, software defined networking. FatPipe technology provides the world's best intra-corporate wide area network solutions that transcend Internet and other network failures to maintain business continuity and high transmission security. FatPipe, with several thousand customers, has offices in the United States, and around the world, with over 700 resellers worldwide including almost all national resellers in the US..
